What is Accounts Receivable Financing?

With competition on the rise, many businesses are finding themselves cash poor due to the demanding terms of their customers.

However, there is an alternative financing solution called: Accounts Receivable Financing.

This allows your business to be more competitive while improving your cash flow, credit rating, and supplier discounts.

Accounts Receivable Financing is a simply buy-sell process. You sell your invoices to a Factor and the Factor gives your cash for an agreed discount.

Unlike traditional bank financing, Factoring relies on the creditworthiness of your customers, not you.

Benefits to Accounts Receivable Financing:

Improve Cash Flow

- Receive cash for your outstanding invoices now
- Market for additional business
- Pay your suppliers faster and take advantage of discounts

Improve Customer Credit Services

- Reduce bad debt
- Streamline credit approvals for new customers
- Reduce administration costs
- Accounts Receivable Management

Flexibility

- Factor as much, or as little, as you want
- There are no minimums and no maximums in the amount you can factor
